SUMMARY

Passionate and detail-oriented Full Stack and Mobile Developer with 1.5 + years of experience specializing in Flutter, React.js, Node.js, and scalable backend architectures. Proven ability to engineer enterprise-level applications, integrate complex APIs, and deliver secure, high-performance solutions for web and mobile platforms.

EXPERIENCE

Elfminds Consulting Pvt Ltd | Mobile App & Full Stack Developer **March 2025 - Present**

Onsite

- **Enterprise Property Platform:** Built a scalable Node.js/Express backend handling core property, tenant, and cash-collection workflows for 100+ properties and 500+ tenants.
- **API & Automations:** Delivered secure integrations and automated WhatsApp/email communications via Google Gemini AI, reducing manual workload by 15-20 hours/week.
- **Field Operations App (Flutter):** Architected a modular mobile app utilizing Riverpod for state management, implementing Role-Based Access Control (RBAC) and deep linking.
- **Media & Reporting:** Engineered features including Firebase push notifications, dynamic on-device PDF generation, GPS-watermarking, and native video compression.
- **NFC Patrol App:** Created a dedicated application enabling security personnel to seamlessly scan NFC tags and track on-site patrolling workflows.

Arctic-Geese Pvt Ltd | Flutter & Backend Developer **August 2024 - February 2025**

Remote

- Developed and deployed **AnkTalk**, a responsive and intuitive Flutter mobile application.
- Contributed to backend architecture by implementing secure RESTful APIs and comprehensive **Role-Based Access Control (RBAC)**.
- **Amazon Clone using React - React.js:** A JavaScript library for building user interfaces, particularly single-page applications. Utilized Redux Toolkit for cart and state management, simplifying item additions/removals. Back-end (Node.js & Express.js) for product management (CRUD operations).
- **Python Automation Bots -** Engineered an AI-powered WhatsApp automation bot and scalable location services using geolocation APIs.
- **Blog Application with Authentication & User Management -** Developed a Node.js/MySQL blogging platform featuring MVC architecture, secure JWT authentication, and role-based access control.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, Dart, C, SQL
- **Frontend:** React.js, Tailwind CSS, Redux
- **Backend:** Node.js, Express.js, MongoDB, MySQL, RESTful APIs
- **Mobile Architecture:** Flutter, Dart, Riverpod (State Management), Deep Linking
- **Tools & Cloud:** Git, Firebase (FCM), Azure Blob Storage, Postman, Swagger UI
- **Key Concepts:** Role-Based Access Control (RBAC), Media Processing, NFC Integration, OOP

EDUCATION

Master of Technology (M.Tech) in Computer Science Engineering **2024 – Present**

Jai Narain College of Technology, Bhopal

Pursuing

Bachelor of Technology (B.Tech) in Computer Science Engineering **2020 – 2024**

Jai Narain College of Technology, Bhopal

CGPA: 8.2

ACHIEVEMENTS

- **GeeksforGeeks:** Actively practiced complex data structures and participated in competitive coding contests.
- **HackerRank:** Achieved a 4-star rating in Python programming problem-solving.
